

Integrated, Sustainable Solutions

for Life Sciences and Public Health

Founded in 1962 and serving the most respected public and private sector life sciences and healthcare organizations, **Tunnell Consulting** integrates scientific, technical, process, and organizational skills to boost the operating performance of each unique client it serves.

We get results like these...

Staffed the leading governmental public health agency with Tunnell's expert vaccine and anti-viral scientists and technologists. Led the product/program management and strategic sourcing efforts to find, characterize, qualify, develop, negotiate, buy, and monitor life sciences suppliers. Targeted effective, sufficient, timely, and sustained supply of critical medical products to combat bioterrorism and pandemic influenza threats.

Applied our knowledge of scientific-based, governmental organizations with advanced expertise in Human Capital management to the government body leading healthcare innovation. Improved strategic Workforce Planning and allied Human Capital management for sustained organizational improvement.

Increased a multi-billion dollar pharmaceutical client's manufacturing capacity by 40%, and saved the company an estimated \$22 million by reducing and controlling process variation.

Effected widespread culture change for a major pharmaceutical organization, resulting in a two-fold increase in manufacturing capacity, and reducing batch record review cycle time by 50%.

Reduced chemotherapy infusion time by 60% at a 600-bed hospital.

Implemented a Lean Six Sigma methodology for a consumer products giant, producing \$15 million in bottom-line results through increased throughput, reduced cycle time and process improvement.

Helped a highly diversified client develop an extremely successful OTC product, marking the first time the company outsourced product development. A 30-fold ROI was reported in year one alone.

Created a state-of-the-art technology transfer process for a pharmaceutical world leader – reducing cycle time 4-8 months in the transfer of product/process through commercialization.

Developed a robust R&D lab training program for a rapidly expanding worldwide pharmaceutical company, boosting throughput/productivity by more than 30%.

Reduced an S&P 500 index company's order cycle time by 40% through distribution center redesign.

Executed an accelerated acquisition approach for a large medical device company, achieving all synergy targets (\$70 million in savings), and significantly boosting company sales revenues.

for respected clients like you.
